CSS SELECTORS –
COMBINATORS

COMBINATORS – DESCENDANT & DIRECT DESCENDANT

METHOD	EXAMPLE	REAL WORLD EXAMPLE
Descendant	**.parent .child** 'The descendant selector **matches all elements** that are **descendants** of a specified element.'	**ul li** **ul li[id='fruits']**
Direct Descendant	**.parent > child** 'The child selector selects all elements that are the children of a specified element.'	**div > input** 'Searches for direct children of a given element; **only looks one level down** the mark-up structure and does not search deeper. '
